EDUCATION

University of Illinois Urbana-Champaign
B.S. in Bioengineering, Aug 2024 - May 2028
Relevant coursework: Signals and Systems, Biomedical Imaging, Fluid Mechanics, Differential Equations

SKILLS

Python, MATLAB, NumPy, SolidWorks, LabVIEW, Git

RESEARCH EXPERIENCE

Undergraduate Researcher, Tissue Mechanics Lab **Sep 2025 - Present**
University of Illinois Urbana-Champaign *Urbana, IL*

- Designed an efficient finite-element workflow that reduced the fluid-flow simulation time of affine tissue models from six hours to forty minutes.
- Profiled official offline benchmarks and flagged five configuration files with conflicting boundary conditions.

WORK EXPERIENCE

Engineering Intern, Midwest Medical Devices **May 2025 - Aug 2025**

- Automated the calibration log for twelve flow sensors and cut the weekly review from three hours to thirty minutes.
- Wrote first-draft test fixtures.

TOOLS

Python
SolidWorks
LabVIEW
MATLAB
Git

LANGUAGES

English
Spanish

EXPERIENCE

Research Intern, Biomechanics Lab
University of Illinois

Jun 2025 - Aug 2025
Urbana, IL

- Built a gait-analysis toolkit in Python used by eleven graduate students across two labs and three
- Collected force-plate recordings from twenty volunteers under an approved protocol with the lab manager
- Presented weekly results

SUMMARY

Mechanical engineering student who compares wearable sensors for rehabilitation robotics and reports calibration, robustness and interpretability results with counterfactual checks for every study.

Seeking a research position for Summer 2026
