

EXPERIENCE

Research Intern, Microfluidics Lab - Jun 2024 - Aug 2024

- Wrote a grading script that runs student submissions in isolated containers and records time and memory used for each test
- Rebuilt the volunteer scheduling tool so coordinators can swap shifts from their phones and see open slots

Teaching Assistant, Statistics Department - Aug 2024 - May 2025

- Trained a small convolutional network to sort recycling photos taken at the two dining hall bins every week

Machine Learning Reading Group

- Designed a printed circuit board for a soil moisture logger and wrote firmware that wakes up once an hour
- Campus Bus Tracker - React and Flask web app used by about 200 students.

- Interviewed twenty transit riders about late buses and summarized their answers in a two-page city memo
- Presented the results at the Undergraduate Research Symposium in April.

Honors & Awards

- Dean's List for five semesters

ACTIVITIES

Software Engineering Intern, Prairie Analytics

- Analyzed survey responses from 1,200 undergraduates about rent and commute costs with Python, SQL
- Designed, built and tested a line-following robot for the intro course
- Built an inventory dashboard that the campus food pantry checks before every delivery in Champaign, IL
- Translated onboarding documents from Spanish to English for a legal clinic
- Graded weekly programming assignments for 180 students and wrote the autograder test suites in C++
- Led two review sessions before each midterm exam
- Ran weekly code reviews for the twelve members of the robotics team and kept notes on recurring bugs;
- Mentored two new members through their first pull requests
- Rewrote the student radio station's scheduling app so the hosts can trade time slots using React, Node.js
- Python, SQL, Tableau

Data Analyst, City of Champaign

Analyzed survey responses from 1,200 undergraduates about rent and commuting costs with Python, SQL

Designed, built and tested a line-following robot for the intro course

Built an inventory dashboard that the campus food pantry checks before every shipment in Champaign, IL

Research Intern, Microfluidics Lab

Rewrote the student radio station's scheduling app so that hosts can trade their slots using React, Node.js

Python, SQL, Tableau

实习经历

软件工程实习生，草原数据分析公司 2025.06 - 2025.08

- 负责后端接口设计与数据库建模，使用 Flask 与 PostgreSQL 实现用户、商品与订单模块，并编写部署文档
- 在暑期实习中重写夜间数据处理任务，使运行时间从四十分钟降到九分钟，并为关键步骤补充了监控与报警

本科生研究助理，生物力学实验室 2024.09 - 2025.05

- 参与医学影像标注项目，按照临床医生制定的规范标注了四千张图像，并整理标注规范中的常见问题与示例

校园活动

组织校园编程工作坊，面向一百五十名同学讲授 Python 基础，并准备课后练习题和答疑记录供大家复习使用

参与医学影像标注项目，按照临床医生制定的规范标注四千张图像，并整理标注规范中的常见问题与示例说明

在暑期实习中重写夜间数据处理任务，运行时间从四十分钟降到九分钟，并为关键步骤补充了监控与报警规则

- 组织校园编程工作坊，面向一百五十名同学讲授 Python 语言基础，并准备课后练习和答疑记录供大家复习

荣誉

- 校级优秀学生奖学金

EXPERIENCE

Software Engineering Intern, Prairie Analytics

- Rewrote the student club website in Next.js so officers can post their events without asking the webmaster

Caterpillar

Data Science Intern

- Trained a gradient boosting model to predict which books students will request next term at the main library

Accomplishments

- Reviewed pull requests for a student-run open-source project and wrote contributor guidelines of the club

COMPETITIONS

- Organized a weekend hackathon for 150 students with prize sponsors from four local companies in Urbana
PantryPal

- Tools: Python, SQL, Airflow, dbt, Docker, Kubernetes, Terraform, AWS Lambda, Redshift, Looker, Git, Jira

Teaching Assistant, Statistics Department

- Maintained the equipment checkout system that the photography club and two other student groups rely on
Research Intern, Microfluidics Lab

- Set up the tutoring schedule and the waitlist form that the students in the intro physics course signed up for
Volunteer Coordinator, Eastern Illinois Foodbank - Jun 2024 - Aug 2024

PROJECTS

- Wrote unit tests for the parser.
- Added a nightly job that checks the backups.
- Mapped bike lane gaps around campus with QGIS and presented the map to the facilities office last spring
- A web app that shows live bus positions to about 200 students.
- Designed the logger board and wrote the firmware that wakes up once an hour to save power on the farm
- Custom firmware that logs soil moisture every hour on battery power.

ACTIVITIES

Tools: SolidWorks, MATLAB, LabVIEW, COMSOL, Arduino, ImageJ, Excel, Python, Simulink, KiCad, Altium
Research Intern, Microfluidics Lab

Built a self-service sign-in portal for the campus makerspace that all 300 student members now use to log in

Mentored two new members through their first pull requests

Ran gel electrophoresis for a plant genetics lab in Urbana and kept the shared sample database consistent

12 students mentored through their first research projects

Technologies: React, TypeScript, Node.js, Express, PostgreSQL, Redis, Docker, GitHub Actions, Jest, Bash

Finalist, Illinois Innovation Prize
